What you will study. Scientific enquiry, whether in the field or in the laboratory, proceeds through objective observation and experimentation: good experimental design starts with a clearly defined and testable hypothesis or research question and proceeds by assembling the necessary equipment and techniques to carry out investigations to test that hypothesis.

SXPA288 | Practical Science: Physics and Astronomy

Astronomy is the oldest of the natural sciences, dating back to antiquity, with its origins in the religious, mythological, cosmological, calendrical, and astrological beliefs and practices of prehistory: vestiges of these are still found in astrology, a discipline long interwoven with public and governmental astronomy. It was not completely separated in Europe (see astrology and astronomy ...
