Best Telescopes for the Money. A photon leaps off the sun and, about 500 seconds later, bounces off our Earth. Light has been dancing and rebounding from faraway and nearby celestial objects for more than 13 billion years. It's time you caught some of it for your very own. That's what telescopes do; they gather light.

Best Telescopes for the Money - 2018 Reviews and Guide

Chapter 4: Telescope Making Basics 37 As for CCD cameras, the telescope's focal length determines the smallest angular detail that a CCD array can record. That detail must cover a minimum of two pixels on the CCD array to be discernible. The amateur can weigh all of this advice to find the instrument that corresponds to his or her needs.

Mirror making. Since the Newtonian reflector is the most common telescope built by amateur telescope makers, large sections of the literature on the subject are devoted to fabrication of the primary mirror. The mirror has to be carefully ground, polished and figured to an extremely accurate shape, usually a paraboloid.

Amateur telescope making - Wikipedia

Aâ€œCl i lâ€•N t i T IA â€œClassicalâ€• Newtonian Telescope: ïf~ Is the simplest type of telescope. ïf~ Mt lhMost commonly home-bilt t tlbuilt amateur telescope. ïf~ Uses a primary concave mirror to gather light, and a smaller flat secondary mirror which directs converging cone of light to side of tube for visual or photographic use.
