Harm reduction, or harm minimization, is a range of public health policies designed to lessen the negative social and/or physical consequences associated with various human behaviors, both legal and illegal. Harm reduction policies are used to manage behaviors such as recreational drug use and sexual activity in numerous settings that range from services through to geographical regions.

The uncertainty reduction theory, also known as initial interaction theory, developed in 1975 by Charles Berger and Richard Calabrese, is a communication theory from the post-positivist tradition. It is one of the only communication theories that specifically looks into the initial interaction between people prior to the actual communication process. The theory asserts the notion that, when ...
