2019 NFPA Conference & Expo in San Antonio, Texas. The NFPA Conference & Expo is one of the world's biggest and most comprehensive fire, electrical, and life safety events.

NFPA

NFPA20 - Commercial Fire Pumps. NFPA-20 is the National Fire Protection Association's code section governing the construction and installation of stationary fire pump systems. Sections of this code cover everything from requirements for system component markings to temperature or altitude specific rating changes for diesel engines.

Fire Pump 101 | Commercial Fire Pumps (NFPA20)

A fire pump is a part of a fire sprinkler system's water supply and powered by electric, diesel or steam. The pump intake is either connected to the public underground water supply piping, or a static water source (e.g., tank, reservoir, lake). The pump provides water flow at a higher pressure to the sprinkler system risers and hose standpipes. A fire pump is tested and listed for its use ...

A fire sprinkler system is an active fire protection method, consisting of a water supply system, providing adequate pressure and flowrate to a water distribution piping system, onto which fire sprinklers are connected. Although historically only used in factories and large commercial buildings, systems for homes and small buildings are now available at a cost-effective price.
