G7 Principles and Actions on Cyber - mofa.go.jp

Internet security is a branch of computer security specifically related to not only the Internet, often involving browser security and the World Wide Web [citation needed], but also network security on as it applies to other applications or operating systems as a whole. Its objective is to establish rules and measures to use against attacks over the Internet.

Internet security - Wikipedia

In computer security, a hacker is someone who focuses on security mechanisms of computer and network systems. While including those who endeavor to strengthen such mechanisms, it is more often used by the mass media and popular culture to refer to those who seek access despite these security measures. That is, the media portrays the 'hacker' as a villain.

Security hacker - Wikipedia

Detailed Description Excerpts. According to Saltzer and Schroeder [Saltzer 75] in "Basic Principles of Information Protection," page 9: Least privilege: Every program and every user of the system should operate using the least set of privileges necessary to complete the job.
