In software engineering, a resource-oriented architecture (ROA) is a style of software architecture and programming paradigm for supportive designing and developing software in the form of Internetworking of resources with "RESTful" interfaces. These resources are software components (discrete pieces of code and/or data structures) which can be reused for different purposes.

### **Resource-oriented architecture - Wikipedia**

The Verification Academy is organized into a collection of free online courses, focusing on various key aspects of advanced functional verification.
